

**Are you over 65 and
considering home care?**

At Mark & Sylvie's, we bring
health to home care.

Healthy Home Care

Compassionate Home Care

Mark & Sylvie's Home Care is an approved provider of government funded Home Care Packages, founded by local doctors who are passionate about caring for the elderly. Our services include:

Nursing

Our enrolled and registered nurses can assist you with your medical needs. This might include dispensing medications, administering injections, and providing wound dressings.

Personal Care

Our personal carers can help with activities of daily living, such as having a shower and getting dressed. They can also provide companionship, social support, accompanied shopping or help with transport for appointments.

Light Gardening

We have our own gardener who can mow your lawns and tidy up your garden, weeding and pruning as needed. For larger scale jobs involving big trees, we have trusted contractors that will work with us.

Domestic Assistance

Domestic assistants help you with jobs around the home, such as cleaning and laundry. We also offer spring cleaning and window cleaning.

Home Maintenance

Your Home Care Plan allows for reasonable modifications to your house, to improve the safety of your home. Modifications are assessed by an occupational therapist, and the work will be carried out by a contractor.

Meal Preparation

Our carers can help you prepare and cook meals, or arrange for them to be delivered from a provider like Lite 'n' Easy. Your Home Care plan can cover the cost of preparing and transporting meals, however, not for the cost of the food itself.

Integrated Health Care

If your ongoing health issues require you to see any allied health professionals such as a podiatrist, physiotherapist, occupational therapist or dietitian, your Health Care Plan funding can pay for these services.

Through our parent medical company, **Atticus Health**, we are able to provide ongoing general and specialist medical advice and care along the way. Our network of healthcare professionals includes:

- General Practitioners
- Nurses
- Podiatrists
- Physiotherapists
- Audiologists
- Occupational Therapists
- Dietitians
- Geriatricians
- Cardiologists
- Urologists
- Surgeons
